

Mobile Robotics Engineer - Internship

Company: Terabee, High-Tech sensor and sensing solutions company

Location: France, Saint Genis-Pouilly, (Close to Geneva, next to CERN)

Contract: 6 month Internship (with potential for full-time employment)

Terabee is a dynamic and fast-paced technology company that designs, develops and manufactures the TeraRanger brand of sensors, bringing new ideas and unique solutions to robotics, automation, IoT and smart city challenges.

We are now seeking a Robotics Engineer Intern to join our growing robotics team! You will operate within a highly stimulating and international environment. You'll be a team player with a passion for mobile robotics, a creative mind and a sense of initiative.

You will need to be eligible to stay and work in Europe for 6 months or more and have the support of your university or other internship program. Terabee will pay a monthly stipend as governed by French law.

Required:

- Programming skills in C/C++, Python
- Experience working with ROS
- Basic knowledge of Linux
- Knowledge of control of mobile robots
- Strong English language, spoken and written

Good to have:

- Experience in working with vision systems
- Knowledge of ROS navigation stack
- Good knowledge of Git
- Experience working on at least one RTOS (preferably on an embedded platform)
- Experience in working on robotics projects (drones, mobile robots, autonomous cars etc.)

Please send your CV and a letter of motivation to careers@terabee.com with the subject line [mobile-robotics-intern]. We look forward to receiving your application.
